**CriMiNaRe presenta:**

## **Mostra fotografica di Mario Badagliacca LETTERS FROM THE CIE**

*Barbed wire, soldiers, search dogs and torchlights in the night. Even in Italy there is an internal frontline, just like in Eastern Europe. But the battle against migrants is taking place through the Identification and Expulsion Centers (CIEs).*

*Letters from CIE is part of a bigger visual project about the Identification and Expulsion Centers in Italy. Italy, and other European countries, are at the center of serious violations of human rights with the detention and forced deportation of thousands of migrants. The Identification and Expulsion Centers are deplorable examples of the contradictions of Italian and European laws on migration.*
